

WALT DISNEY PARKS AND RESORTS CAGE-FREE EGG STATEMENT

It is our policy that all liquid and shelled eggs purchased and served in the U.S. by Walt Disney World Resort, Disneyland Resort and Disney Cruise Line, and in France by Disneyland Paris, are cage-free, excluding Operating Participants and Licensee locations.

It is our goal for the Company operated parks and resorts in Hong Kong and Shanghai, to exclusively serve cage-free shelled and liquid eggs by 2030. While supply and market constraints vary regionally, and stable supply in all regions is not reliably available at commercially reasonable prices, we will work with suppliers and other stakeholders to address challenges and improve market conditions to promote expansion of cage-free egg supply. We will report, on an annual basis, the percentage of eggs at each of these locations that are cage-free, to demonstrate progress toward this goal. In fiscal 2024, 98% of shelled and liquid eggs served at Hong Kong Disneyland were cage-free, and 32% of shelled and liquid eggs served at Shanghai Disney Resort in 2024 were cage-free.

We will encourage the third-party to which we license our intellectual property to operate Tokyo Disney Resort to adopt a similar policy.

Supply, availability at commercially reasonable prices, other market constraints and other factors impact our egg purchases.

Statement Date: June 5, 2025
